

In today's EMD world, information is power. Let the EMD Advancement Series be the power behind your continuing education training.

CDE

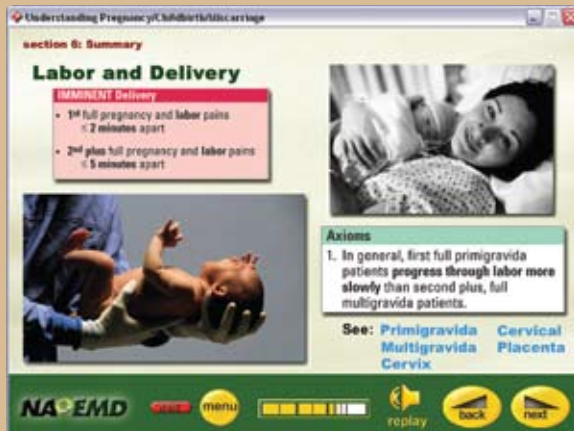

Continuing Dispatch Education

Computer-based training (CBT) is the newest, most economical educational tool. It will enhance your learning experience and help your agency reduce course development costs, instructor fees, overtime pay, and the logistical headaches of scheduling classroom hours for group training.

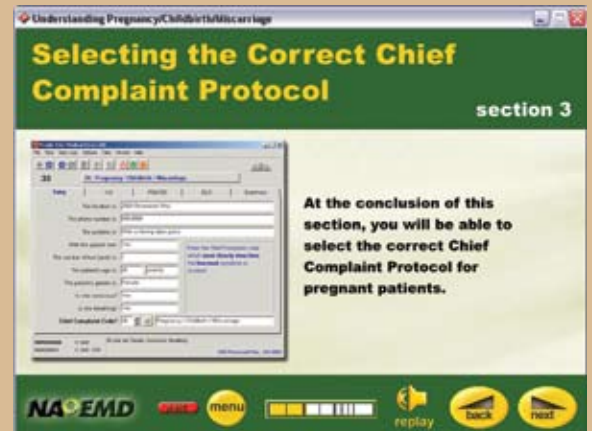

Creative use of audio-visual effects, including full-motion video clips, permits EMDs to experience many of the same emergency medical events they have previously only heard described over a phone—seizures, strokes, burns, electrocutions, and drowning—all become dramatically real after completing this series. These lessons provide the EMD with enhanced knowledge and skill, better evaluation of emergency events, as well as a greater understanding of the patient's needs.

THE EMD ADVANCEMENT SERIES is the first computer-based continuing education program designed specifically for the EMD. The course content is a cooperative effort between National Academy of Emergency Medical Dispatch® (NAEMD®) content experts and the professional curriculum and educational staff at Priority Dispatch Corp., with input from EMDs, communication center managers, supervisors, and EMD training specialists.

Timely Topics

The EMD Advancement Series™ topics are carefully chosen to help dispatchers gain in-depth understanding of the complex medical conditions at the heart of the Priority Dispatch System® Chief Complaints. Topics are also chosen to provide a deeper knowledge and understanding of how the protocols function in dealing with these medical emergencies in a safe, universal way.

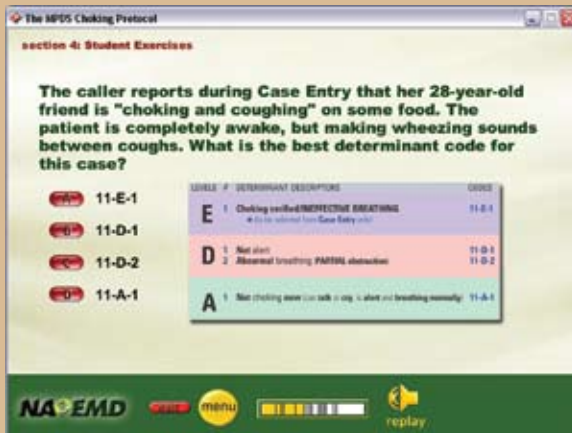

Case Studies

Real world case studies add interest and demonstrate how the principles discussed in the lessons can be applied to actual emergency calls. Case Studies also help you learn how to select correct Chief Complaint Protocols and Determinant Descriptors.

**“It’s almost like
going on the call
myself.”**

Self-Paced

Designed for self-paced individual learning, this remarkable, as well as fun, training provides two-hour lessons divided into small, easily digested sections. Interactive question and answer sequences are followed by a comprehensive course test that is electronically scored and printed.

Interactive Multi-Media

If a picture is worth a thousand words, the audio and video content in these lessons is priceless. The varied, dispatch-related approach to learning provides a lasting mental picture essential to enhancing the non-visual world of the EMD.

BENEFITS OF THE COMPUTER-BASED EMD ADVANCEMENT SERIES:

- *Reduces in-house training costs and overtime*
- Learning format *improves skills and knowledge retention*
- *NAEMD-approved* continuing dispatch education
- Documented *individual post-test scores*
- Learning is *self-paced*
- *Flexible lesson times* eliminate the need to schedule group or classroom lessons
- Individual lessons can be *completed anywhere* a PC is available
- *Improves protocol compliance*
- *Enhances patient care delivery*

**“Your EMDs
will want to return
to this series
again and again to
reinforce EMD skills.”**
